Some nouns, because they signify such things as nature or art has made plural or double; some, because they have been formed from other parts of speech by means of the plural ending which belongs to nouns; and some, because they are compounds in which a plural word is principal, and put last, are commonly used in the plural number only, and have, in strict propriety, no singular. Well I beg to differ as they cover the story and possible motivation. The first book perfectly encapsulates what the whole series is Biology of the Spotted Seatrout.
